Usability criteria for AAL solutions and Smart Homes for elderly people
Emma – the flexible living assistant

The European report 'EU CoDC Assessment of the State of the Art' (2019) is a landmark document that outlines the current state of research and practice in the field of AAL. It provides a comprehensive overview of the challenges and opportunities in this domain and offers a set of usability criteria to guide the development of AAL solutions.

Emma is a community platform with an innovative and accessible user interface. It is a multi-actor system of digital services and information tools. The platform is designed to be used by elderly people and their family members to support the elderly in their daily lives. Emma is a flexible living assistant that can be used in a variety of ways. It can be used to manage a household, to coordinate care, or to provide information and support. Emma is a flexible living assistant that can be used in a variety of ways. It can be used to manage a household, to coordinate care, or to provide information and support.
